***Understanding the Impact
of Nutrition and Gut Bacteria
on Transplant Outcomes***

October 13, 2018

Zuckerman Research Center
New York City

presented by

The Bone Marrow Foundation

in partnership with

Memorial Sloan Kettering Cancer Center

Guest speakers from Memorial Sloan Kettering Cancer Center and Fred Hutchinson Cancer Research Center will focus on the nutritional approaches adopted by hematopoietic stem cell transplantation (HSCT) centers, the nutritional impact on Graft vs Host Disease (GVHD), and oral considerations prior to transplant. They will discuss the neutropenic diet and how microbiome impacts nutritional care.

Continuing education credits.

Invitation with additional details and registration information will follow.
